

# DDC

# Aqua Shield

Wash & Scale Inhibitor

## Advanced Protection for all **Bedpan Washer Disinfectors**

Formulated to enhance cleaning prior to steam disinfection and significantly reduce scale build-up.

Aqua Shield PRO keeps your washer disinfecter performing efficiently and hygienically.

# Aqua Shield

Wash & Scale Inhibitor

**Aqua Shield Pro** has been formulated to enhance performance, support infection control, and extend the life of bedpan washer disinfectors.

This powerful, phosphate-free solution works with all DDC Panamatic models and other manufacturers machines subject to compatibility & performance testing\*. It breaks down scale, organic waste and residue that compromise hygiene, helping to prevent breakdowns and maintain disinfection standards.

## Product Benefits:

- **Delivers strong cleaning performance**, specifically designed to tackle biological waste in healthcare settings
- **Effectively targets and removes scale** build-up, improving performance and reducing the risk of breakdowns
- **Breaks down complex proteins and organic matter**, making cleaning more efficient and effective
- **Provides consistent results**, helping to maintain high hygiene standards in every cycle
- **Helps dissolve organic compounds** that contribute to scale build-up, supporting long-term equipment care
- **Contains agents that reduce and remove staining**, restoring a visibly clean finish
- **Maintains effective disinfection** throughout use, supporting infection control measures
- **Phosphate-free** formula makes it a more environmentally responsible choice without compromising on results
- **Ideal for both new and older machines**, delivering thorough cleaning while protecting internal components.
- **Compatible with all DDC Panamatic models.** Compatibility with other manufacturers' machines is subject to successful compatibility and performance testing.\*

\* Subject to DDC advice on dose rate and compatibility

\*\* Reduction in existing scale deposits are dependent on many factors and can't be guaranteed

The steam generator is an essential part of the bedpan washer and must be protected against the formation of scale which can lead to longer heating times, higher power consumption, overheating and the potential for irreparable damage to the heating element.

**Stronger** cleaning.  
**Smarter** chemistry.  
**Superior** performance.
