

PANAMATIC® MAXI BEDPAN WASHER

The new Panamatic Maxi Bedpan Washer Disinfecter with increased capacity.

The Panamatic Maxi is now one of DDC Dolphin's highest capacity bedpan washer disinfecter, matching that of the Optima 3. It can now hold up to 6 items, an increase of 20% on the previous model.

Energy Efficiency for Cost Savings

Able to accommodate a variety of items in various combinations the extra large wash chamber helps deal with the ever growing demands of busy wards, high dependency units or nursing level care settings. Based on a full load, the new Panamatic Maxi's enhanced capacity makes it 20% more energy and water-efficient than the previous model. So you can wash more bedpans for the same energy and water consumption as before. Hospitals and care homes can experience significant operational cost savings without compromising on the quality of bedpan disinfection.

New Modern Look enhancing infection control

Aesthetic enhancements include new round, illuminated buttons which complement the Panamatic Maxi's smart new styling increasing its exterior infection control qualities. Its new inherent antimicrobial properties in the front panel and front decal help reduce the risk of cross infection, plus an ultrasonic foot sensor elegantly replaces the old foot plate, eliminating dirt traps and enhancing hygiene.

Design Enhancements

- An ultrasonic foot sensor elegantly replaces the old foot plate, eliminating dirt traps and enhancing hygiene.
- Updated and clear modern symbols for 'in cycle' and 'cycle complete' provide intuitive operation.
- Antimicrobial panel and decals on the front of the machine reducing the risk of cross contamination.
- Stainless steel sides cover the rear water tank, simplifying cleaning.

PANAMATIC® MAXI BEDPAN WASHER

Advanced Biomaster Antimicrobial Protection

The new Panamatic Maxi takes infection control to the next level with an antimicrobial front panel and touch area new to the next generation Panamatic Maxi. Impregnated with leading-edge Biomaster antimicrobial protection in the Panamatic Maxi's front panel ensures a robust defence against harmful pathogens.

Biomaster antimicrobial powder has been tested and proven to reduce the growth of various bacteria strains by up to 99.99%, meeting the rigorous standards of ISO 22196:2011 and it reduces the growth of Campylobacter, E.coli, Listeria, MRSA, Pseudomonas and Salmonella by up to 99.99%.

The New Panamatic Maxi is perfect for high-demand care settings and wards and can accommodate up to six reusable items in a seven-minute cycle.

Benefits

New Polygiene protected antimicrobial front panel and decal.

Ultrasonic non-contact foot sensor

Large wash chamber with 20% increased capacity to suit high usage healthcare environments.

User-centric design enhancements
