

Our commitment to Sustainability

DDC Dolphin are committed to improving sustainability across the care sector.

Our sluice room and infection control strategies have allowed hospitals and care homes alike to reduce their impact on the environment.

The responsible use of care products and machinery is one of the ways the NHS hope to become the world's first zero carbon national health provider.

DDC solutions will:

- ✓ Increase efficiencies
- ✓ Lower costs
- ✓ Reduce carbon footprints
- ✓ Deliver high performance

Did you know?

Our Pulpmatic Eco+ use very little water or electricity... up to 50% less than a conventional macerator.

Our Hygenex Patient Care Wipes contain absolutely no microplastics.

Our Panamatic Bedpan Washer Disinfectors use advanced temperature control to lower power and water waste.

**...together,
we're on the
right track.**
